ADDRESS

TO THE

NERVOUS

AND

DEBILITATED

Whose sufferings have been protracted from hidden causes, and whose cases require prompt treatment to render existence desirable. If you are suffering, or have suffered, from involuntary discharges, what effect does it produce upon your general health Do you feel weak, debilitated, easily tired? Does a little extra exertion produce palpitation of the heart? Do you have spells of short breathing or dyspepsia? Are your bowels constipated? Do you have spells of fainting or rushes of blood to the head? Is your memory impaired? Is your mind constantly dwelling on this subject? Do you feel dull, listless, moping, tired of company, of life? Do you wish to be left alone, to get away from everybody? Does any little thing make you start or jump? Is your sleep broken or restless? Is the lustre of your eye as brilliant? The bloom of your cheek as bright? Do you enjoy yourself in society as well? Do you pursue your business with the same energy? Do you feel as much confidence in yourself? Are your spirits dull and dagging, given to fits of melancholy? If so do not lay it to your liver or dyspepsia. Have you restless nights? Your back weak, your knees weak, and have but little appetite, and you attribute this to dyspepsia or liver complaint?

How many men, from the effects of excesses, have brought about that state of weakness in the vital organs that has reduced the general system so much as to induce almost every other disease—idiocy, lunacy, paralysis, spinal affections, suicide, and almost every other form of disease which humanity is heir to, and the real cause of the trouble scarcely ever suspected. Many are

Fluid Extract of Buchu

There is no tonic like it. It is an anchor of hope to the physician and patient. This the testimony of all who have used or is prescribed it.

Beware of counterfeits and those cheap decoctions called Buchu, most of which are prepared by self-styled doctors, from deleterious ingredients, and offered for sale at "less price" "larger bottles," etc. They are unreliable and frequently injurious. ASK FOR HELMBOLD'S. TAKE NO OTHER.

Price $1.25 per bottle, or six bottles for $6.50, *delivered to any address. Describe* symptoms in all communications.

The Power of Song.

Through the long aisles her clear voice rose and rang,
Thrilling above us to the vaulted roof,
Dying in fretted niches far aloof;
Borne on its wings our fancies Heavenward sprang

The latterer on the sunny morning lea
Starts as a bird springs sudden at his feet;
Hears the fresh air awake to music sweet,
And forming darted eyes above him, sees

The brown wings flutter, hears the rippling notes,
Till bird and strain both vanish in the blue;
Thus, from the fair world, bathed in light and dew,
His silent praise up with the cadence floats.

And, through the day's full hours, hot, hard, and long,
The magic of sweet sounds lulls brain and heart,
Haunting the camp, the court, the street, the mart,
With rare faint echoes of remembered song.
—*Tinsley.*

THE TRAINING OF WOMEN.

We do not say the "Education," nor the "Industrial Training" of women, for we mean both. But we wish to say, with all reverence and respect, that women do not make good use of their opportunities. Scarcely one, perhaps, but will complain of "want of a sphere" for her exertions; and yet who among them try to qualify themselves for these "spheres?" As a general rule, the sons of our farmers and respectable mechanics, after the age of sixteen, have steady and hard work. Yet many of them, by a good use of their evenings, qualify themselves for taking the highest posts in the counnry. Their sisters have immeasurably the advantage of them, as to leisure and time. There are thousands of such girls in this Province who could spend three or four hours every day, if they chose to do it, in direct study or industrial training. A girl could often get a good situation as book-keeper; but who among them qualifies herself as a book-keeper? A girl could often get paying and steady work as a compositor in a printing office. But how many

McCREADY & Co's.

The cold and the frost have again come on the earth,
And the cold chilly winds again have their mirth,
So off with your linens, get woolens instead,
And dress with the season, to show you're well bred.

It's idle, much talking, these coming cold days,
The best place to get clothing is where it best pays,
And now we'll remind you, if we haven't before
That McCready & Co's. is the cheap Clothing Store.

At morning, at noon or at close of the day,
If perchance you happen to travel that way,
Just call at our store, look about for yourself,
And see our nice goods on counter and shelf.

Before, you might miss it, but certainly now,
Since the store we enlarged, and altered it so,
The Clothing Emporium, on Trenton Front Street,
Is attractive to all whose entrance we greet.

Not only our goods are tastefully made,
You're sure to be suited in making the trade.
No matter the day, warm weather or cold,
What you get for your money is better than gold.

In styles and in cloth, the latest and best,
Are always our study as our goods will attest.
And you never need fear, for we'll tell the truth,
That being our habit from earliest youth.

Our motto, small profits and ready quick sale,
To fit and to please you we never will fail,
For by fair dealing, as every one knows,
Our business enlarges and steadily grows.

In country or village where ever you dwell,
Whether Farmer, Mechanic, Nabob or Swell,
Remember the store where they sell so cheap,
And call on McCready six days in the week.

The truth should be known all over the globe,
That the very best place to get your wardrobe,
In summer or winter, as we told you before,
Is right from the shelves of McCready's New Store.

MACHINE WORKS,

OSHAWA, ONT.

THE JOSEPH HALL

MANUFACTURING COMPANY,

PROPRIETORS.

WE DESIRE TO CALL ATTENTION TO OUR

No. 1 and 2 Buckeye Combined Reaper and Mower, with Johnson's Self-Rake, improved for 1871.

We believe this machine, as we now build it, to be the most perfect Reaper and Mower ever yet offered to the public of Canada.

Among its many advantages, we call attention to the following:—

It has no Gears on the Driving Wheels,

Enabling it to pass over marshy or sandy ground without clogging up the gearing, thereby rendering it less liable to breakage. It is furnished with **four knives, two for mowing and two for reaping, one of which has a sickle edge for cutting ripe, clean grain; the other a smooth edge for cutting grain in which there is grass or seed clover.**

It has malleable guards both on the Mower Bar and Reaper Table, with best cast-steel Ledger Plates. It is also furnished with our **new Patent Tilting Table, for picking up lodged grain.** This is the only really valuable Tilting Table offered on any combined Reaper and Mower. The table can be **very easily raised or lowered by the Driver in his seat, without stopping his team.** This is one of the most important improvements effected in any machine during the past two years.

Any one or all of the Arms of the Reel can be made to act as Rakes, at the option of the Driver, by a lever readily operated by his foot. The cutting apparatus is in front of the machine, and therefore, whether reaping or mowing, the entire work of the machine is under the eye of the Driver while guiding his team. The Table is so constructed as to **gather the grain into a bundle before it leaves the Table, and deposit it in a more compact form than any other Reel Rake.**

The Table is attached to the machine both in front and rear of the Driving Wheel, which enables it to pass over rough ground with much greater ease and less injury to the Table.

The Grain Wheel gives a positive motion to the Rakes are driven by Gearing, instead of Chains, and, therefore, have a steady, uniform motion, making them much less liable to breakage on uneven ground, and more regular in raising their teeth. The Gearing is very simple, strong and durable. The Boxes are all lined with

BABBIT METAL.

The parts are all numbered, so that the repairs can be ordered by telegraph or otherwise, by simply giving the number of the part wanted. There is no Side Draught in either reaping or mowing, and the machine is so perfectly balanced that there is no pressure on the horses' necks, either when reaping or mowing. All our malleable castings, where they are subject to much strain, have been twice annealed, thereby rendering them both tough and strong. Our Johnson Rake is so constructed as to raise the Cam so far above the Grain Table that the Grain does not interfere with the Machinery of the rakes or Reel. We make the above machine in two sizes.—No. 1, large size, for farmers who have a large amount to reap.—No. 2, medium size, for farmers having more use for a Mower than for a Reaper. With the exception of difference in size, these machines are similar in every respect. Our No. 2 machine supplies a want heretofore unfilled, viz: A medium between the Junior Mower and the large Combined Machine, both in size and price. We shall distribute our sample machines in March, among our agents, that intending purchasers may have an early opportunity of examining their merits, and **we guarantee that all machines shipped this season shall be equal in quality and finish to the samples exhibited by our Agents.** We invite the public to withhold giving their orders until they have had an opportunity of inspecting our machines, as we believe that they are unsurpassed by any other machines ever yet offered on this continent. We also offer among our other machines:

Johnson's Self-Raking Reaper, Improved for 1871, with two knives smooth and sickle edge, and malleable guards.
Wood's Patent Self-Raking Reaper.
Buckeye Reaper No. 1, with Johnson's Self-Rake.
Buckeye Reaper No. 2, with Johnson's Self-Rake.
Ohio Combined Hand-Raking Reaper and Mower.
Canada Chief Jr. Mower.
Buckeye Mower No. 1
Buckeye Mower No. 2
Billy Ohio Mower No. 1.
Ohio Jr. Mower.
Taylor's Sulky Horse Rake.
Farmers' Favourite Grain Drill.
Champion Hay Tedder.

AND OUR CELEBRATED

HALL THRESHER AND SEPARATOR,

Greatly improved for 1871, with either Pitt's, Felton, Planet, Woodbury, or Hall's 8 or 10-horse power.

We shall also offer for the fall trade a new Clover Thresher and Huller, very much superior to any other heretofore introduced.

A NEW AND COMPLETE ILLUSTRATED CATALOGUE OF ALL OUR MACHINES

Is being published, and will be ready for early distribution, free to all applicants.

All our Machines are warranted to give satisfaction, and purchasers will have an opportunity of testing them, both in Mowing and Reaping, before they will be required to finally conclude the purchase.

For further information, address—

A. PARENT, PROPRIETOR.

Special Notices.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack any weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. Made simply with boiling water or milk. Sold only in packets, labelled—"JAMES EPPS & CO., Homœopathic Chemists, London." Also makers of Epps's Chocolate Essence for afternoon use.

In 1869-70 a reduction in the exports of Cocoa (Cocoa and Chocolate) from 1½ to 1 lb. per cwt. was followed by a reduction in the exports of Chocolate from 81 lbs. to 29 lbs. per cwt. Cocoa (Cocoa and Chocolate) exports to Canada in 1869-70 increased from 1½ to 2 lbs. per cwt.

The Gent's Furnishing, Ready Made Clothing, Hats, Caps, Collars, Braces, Hosiery, Silk and Wool, go to L. A. Purdy's, Brighton.

Black Silks, Black Lustres and Dress Goods bought on the sterling at L. A. Purdy's, Brighton.

An Extra Large stock of Goods for sale, bought on the sterling, and bought at last year's prices. Call and see them at L. A. Purdy's, Brighton.

Fresh Groceries. Twankey Tea 40 cts. per lb. The Best 50cts. Tea in town and will sell for all his energies to the wants of his customers.

Fine Canadian Tweeds $1.60 per yd., worth $1.40; Broad Cloths, Cassimeres, Satinetts, Meltons, Waterproofs, Grass Linens, &c., &c., at L. A. Purdy's, Brighton.

Come one ! Come all ! and inspect carefully at L. A. Purdy's, Brighton.

McGuire has the best half dollar tea in town.

Best No. 1 Coal Oil as cheap as the cheapest at R. W. Purdy's No. 24 Trenton.

Try Stickney Brighton, for the Best No. 1 Shoepacks and Moccasins made to order at very low prices. Call and see them.

If you have any half dollars tea [illegible] Purdy's, Brighton, and get some of that splendid [illegible] you can get [illegible] anywhere else.

Try Stickney Brighton, for the Best Sarsaparilla and Burdock Bitters manufactured in Belleville.

Dr. Wheeler's Compound Elixir of Phosphates and Calisaya.

THERE is no Diseased Condition of the body of which each Dr. Wheeler's Compound Elixir of Phosphates and Calisaya may not be used with positive benefit. Being a Combined Food and Nutritive Tonic, it acts physiologically in the same manner as our food, and thereby Digestion, Assimilation, and the formation of Healthy Blood. It strengthens the vital forces by supplying the waste constantly going on, of nerve and muscle, as the result of mental and physical exertion, enabling mind and body to undergo great labor without fatigue. In addition to building up constitutions broken down with Wasting Chronic Diseases, by fast living and bad habits, is truly a Reformatory, its effect being to restore, by invigorating all the organs of the body. Phosphates being absolutely necessary to every Secretion and the growth of tissues, must for all time be Nature's great restorative and vitalizer.

Sold by all Druggists at $1.

A Friend in Need.—Dr. Wistars' Balsam of Wild Cherry is a friend in deed. Who has not found it such in curing all diseases of the lungs and throat, coughs, colds, and pulmonary affections, and "last not least," Consumption? The 50's are assured that the high standard of excellence in which the popularity of this preparation is based, will always be maintained by the proprietors.

"Horse Men," and others who pretend to know, say that the following directions had better be observed in using Sheridan's Cavalry Condition Powders: Give a horse a table spoonful every night for a week; the same every other night for 4 or 6 nights; then for a mish cow, and twice as much for an ox. The addition of a little fine salt will be an advantage.

We have heard recently of several severe cases of spinal disease cured by Johnson's Anodyne Liniment: one case of a man forty-five years old, who had not done a day's work for four years. The back should first be washed, then rubbed with a coarse towel, apply the *Liniment* cold, and rub briskly with the hand.

Woon's HOUSEHOLD MAGAZINE, under the editorial management of Gail Hamilton, has more than doubled its subscription list, during the past few months. The May number contains: "Migration, Colonization, Homes," by Horace Greeley; "Miss Hannah Adams," by James Parton; "Household discoveries," by Gail Hamilton; "Bonds and Bonders," by Thomas K. Beecher; "Longevity," by Dr. Dio Lewis; Reminiscences of Rev. Dr. Bethune; "What is Wilkie, D. D.," etc. Every woman should read Gail Hamilton's editorial, in which she says: "It will never do to trust men with a liberty which they will abuse. The next thing we know they may be respectable and even distinguished as jurists, doctors merchants, mechanics, and in domestic matters, but children of a larger growth. They must be trained. They may be allowed liberty, but they must not be allowed to take it without permission."

THE HOUSEHOLD is a first class original Magazine, published at one dollar a year, by S. S. Wood & Co., Newburgh, N. Y. A specimen copy mailed free to any address.

Trenton Courier,

THURSDAY, APRIL 25, 1872.

ENLARGED.—We feel much obliged for the many complimentary remarks of late as to the appearance of the COURIER. The encouragement of a substantial nature received in increased circulation, &c., has induced us to still further improve its appearance. If our efforts meet with your approval, dear friend, send us your name and 65 cents to pay for the Courier for balance of this year. If you are taking it, ask your neighbour to subscribe. By thus helping us you will be getting better value and have the consciousness of assisting a good cause.

SPRING.—The ice in the bay between Brighton and Trenton has disappeared. The weather is balmy and warm. Monday was cold with flying snow flakes, but that was weak for April. Fruit trees cannot be had now at any price. The roads are in splendid condition.

ALLAN LINE OF STEAMERS.—Our readers favorite steamers, Passage to Londonderry, Liverpool or Glasgow and back—Cabin $120, second class $48. The fullest information can be obtained by calling at the COURIER office.

BURGLARS.—For some time past a gang of burglars were operating in Toronto. On Saturday night two more arrests were made, and Mowry are arrested. Dougherty using a revolver shot one of the police in the head which forunately is not fatal. Keys and clothes stolen goods, were found in their possession.

NEW FIRM.—Mr. George Bonter has purchased the Drug Store of the late Robert T. Deans, and is now ready to wait on customers. Mr. Bonter has three years experience as a medical student, and will devote all his energies to the wants of his customers.

Those who attended the Concert given at Trenton by the New Orleans Minstrels speak in the highest terms of the performance as of a superior order and free from slang.

The concert was well patronized.

GOVERNOR OF MANITOBA.—AN Ottawa rumor says it is pretty certain that Mr. Morris will be appointed Governor of Manitoba, and Mr. O'Connor will succeed Mr. Morris in the Cabinet.

ANOTHER STEAMER.—The "Stamer *Norfolk*, now in Kingston, has been bought by Capt. Porte, of Belleville, and is to be placed on the route between Picton and Trenton.

There are symptoms of the probability of a very large emigration to Manitoba during the ensuing season. The *Fergus Express* states that over one hundred persons are to leave that neighborhood on Monday for the North-west, and others will follow later in the season. Numbers are also leaving Ottawa for the same destination.

ACCIDENT.—A carpenter named Greatnix, in the employ of the Grand Trunk Railway, while attempting to get on a train in motion at Earnestown on the [illegible] had his right foot [illegible] in Belleville.

MIXED COMMISSION.—The United States and British Commission met on Saturday. Two cases versus the United States were disallowed; seven claims were added to the list of British Claimants, making 52 in all. It was also announced that petitions may be filed by special permission up to the 26th of June, after which no more will be received.

FIRE AT BRIGHTON.

Brighton, April 22nd,—Yesterday at noon a fire was discovered in the store occupied by Mr. J. H. Willoughby in the new brick block. There had been no fire in the premises for twenty-four hours, and no doubt exists that the fire was the work of an incendiary, as spirits of turpentine had been freely used, even lying in pools in the cellar below, Mr. Willoughby's goods, valued at over $8,000, were almost all destroyed. They were ensured for 35,000 in the Hartford and Western Companies. The insurance on the building was $4,000, but little damage was done to it. No blame is attached to Mr. Willoughby. An investigation to-morrow.—*Globe.*

THE WASHINGTON TREATY.—This precious document that has caused such a storm in the tea pot, conceded to Yankees the right to fish in our inshore waters and use the our land for curing purposes, also the free navigation of the St. Lawrence, and lars Canada any indemnity for damage done by Fenian raids, for the consideration of England endorsing Canada's paper for a million, and the privilege of carrying fish to the American market free of duty. The whole affair is a gigantic mistake, offered to Canada by Lord Kimberly, and thankfully accepted by Sir J. A. MacDonald. The Yankees have got all they could ask, and if our fishermen had to pay duty they could charge the same to the consumer and clear a dollar per quintal as to pay no duty and sell fish at the lower rate. The guarantee we will save us about 1 per cent interest but will not sell our bonds an hour fast-er than without that guarantee. If we were bankrupt and could not raise money *on our own security it might be* necessary to negotiate the idea of our credit, but as MacDonald expended all the money we wanted free-ly without the guarantee of Yankee fish-ing privileges, and as by ridding us of our territorial rights, the only opposition by which they could secure reciprocity of trade with the Yankees is removed, away as a thing of the past, the treaty is a mistake. Anderson thinks it would remove a cause of greedy aggression on the part of the Yankees. The Canadian Commissioners have the guarantee of four million pounds sterling in their pockets, and this infamous barter, that they (the Commissioners) were not able to satisfy the Canadian Parliament. To this we suppose Lord Kimberley for the English Government will say:

"That the Imperial Government on their part will fully engage, when the Treaty shall have taken effect, to propose to the Imperial Parliament to guarantee a Canadian loan of £2,500,000 sterling, such loan to be applied to the purposes indicated in the proposal of the Canadian Government, and Canada being allowed at the same time an equal proportion by an unguaranteed loan for the same object, on the understanding that Canada abandons all claims on Great Britain on account of the Fenian raids."

It will be seen that we may save 1 per cent interest on ten million dollars, or $125,000 yearly. Now the navigation of the St. Lawrence utilized by our own merchant fleet is worth half the amount then the hall of those who now live by the fisheries will be thrown out of that support, and direct as well as indirect loss will insue. All this to make peace for England without costing England one dollar. We hope our representatives will take a more statesman-like view of the matter and hold intact our inalienable rights.

MANUFACTURES IN STRATFORD,

$12,000 BONUS AND $20,000 LOAN PROPOSED.

The citizens of Stratford are moving with promptness and unanimity in the matter of giving public aid to manufactures. Meetings of business men have been held to discuss the propriety of the town offering bonuses, loans, &c., as inducements to manufacturers to build factories, and employ a large number of workmen. It appears that a manufacturing firm at a distance are prepared to erect extensive, substantial buildings, in which they would place $40,000 worth of machinery and plant, and employ on the start 200 skilled workmen, besides unskilled labor, provided the corporation would give them a bonus of $12,000 and a loan of $20,000 at 6 per cent per annum. A mass meeting, more of a public nature, is to be called in an early day, to discuss the consideration of the matter, and to discuss the propriety of the town granting liberal new railways. A correspondent says:

"Stratford has been paying paid out in wages at the G. T. R. works here, every four weeks by the company, is seeing very plainly among all classes of the community, either directly or indirectly." Two companies of artillery are to be formed at once from the men employed in the engineer department at St. Mary's are to be moved here immediately. The Town with the assistance of the department are to form two rifle companies, the whole to be supp ied with new uniforms and a first class brass band is to be used in connection with the volunteer movement. Who will dare say that we are not advancing and prospering in a greater degree than any other town in the Province? Stratford is bound to become a manufacturing, commercial, and railway centre, and therefore must also merge into a city.—*St. Mary's Vidette.*

History records many singular instances of the manners and customs of whole nations undergoing an entire change in deference to the wish and merely in imitation of the practice of some despotic monarch. In ancient times the Jewish even of faith on the part of the king was at once followed by a corresponding change among his subjects. But the most remarkable case of this kind ever recorded is that now taking place in Russia, where it is stated that the Czar Alexander I. by becoming a Freemason, has given a powerful impetus in the promotion of temperance, is rapidly converting a nation of topers into the most sober people upon the face of the earth.

The philanthropic ladies of Hartford, Conn., have taken a very practical way of showing their sympathy for working-men. They have just opened a restaurant, and have brought down the scale of prices so low as to bring it within the reach of the poorest mechanic and laborer. Added to the dining-saloon is a comfortable reading-room, well stocked with newspapers and the best magazines and newspaper offices. The main object is to induce men to frequent it who now spend much of their time in barrooms; and judging from the attendance on the opening day, the experiment promises well. [illegible] between [illegible] and [illegible] understanding relators to claims for indirect losses in the late war, [illegible] American shipping to the Big [illegible] The [illegible] Loss from enhanced story: [illegible] indirect suffering from his [illegible] plained to his [illegible] of his congregation [illegible] it [illegible] it continually [illegible] before he had finished [illegible] sermon. "That would not do for [illegible] replied the friend in a very confident tone. The pastor well knowing that his friend was not a Cicero, offered to lay him a wager that the hearers would treat the preaching of his guest as they treated his own. The latter immediately accepted it, and commenced his preaching with the following introduction: "Brethren and Christ, my discourse contains two divisions, my first is for the godless, the second for the righteous. Let us begin with the first part. This was very brief, and concluded with the following apostrophe: "Now you sinners, you who blaspheme Christ and make a mock of His holy teaching, ye who are full of all vice and far from repentance, I have done with you. Arise, and take the road of from the Lord's house, for the second part of my discourse is devoted to those amongst you who are of a clean heart!" Not one of the congregation arose until the amen was uttered. They were all of a clean heart.

GREAT BIBLE MEETING AT ROME.—The *London Daily News* correspondent at Rome, under date of March 5th, sends a report of the Inauguration Meeting of the Italian Bible Society, of which we have had a brief telegram. It took place on the Capitol Hill, and the theatre, which was crowded to excess. The committee consisted, of a large number of Roman Princes, Members of Parliament, the President of the Italian Senate, Count Mamiani, the Grand Duke of Nassau and his suite, &c. The chair was occupied by Mr. James Carmichael, one of the inspectors of the Company, has made equally good success in the East, having established agencies at Constantinople, and a letter received yesterday announces the establishment of a branch office at Smyrna. Millbrook.

The success of the Confederation is now an established fact, it having received an amount of business and standing in the public mind which has fully sustained even after years of hard work. With the success of this home Company, it is clearly demonstrated that Canadians are ready to support home institutions in preference to foreign ones, especially when the advantages offered are offered as those of the Confederation. As a further evidence of the favor with which this Company is being received, applications in the General Branch in sums from $10,000 downwards, were received by mail from thirty persons on Saturday alone, of which, four for $15,000 were from Nova Scotia, and upon these the annual premiums amounted to nearly $650.

The Confederation is rapidly becoming the National Company of Canada.

Such remarkably good results must be satisfactory to all concerned, and furnish the best proof of the fact that this Company is fast becoming the most popular one throughout the Dominion.]—*Daily Leader*, April 17th, 1872.

GEORGE YOUNG, Agent, Trenton.

Correspondence.

For the Courier.

"Train up a child in the way he should go, and when he is old he will not depart from it."

The parent who endeavors to give his child a moral and religious training and by pious example and holy living not only shows but leads the way, is doing a noble work, and is a better legacy than lands or riches alone. A child may be compared to a climbing plant or trailing vine. If it be left to itself how soon would it cover the ground with its wayward growth, unchecked by knife or directing hand. So with your child, there is something so elastic, so vigorous, so buoyant in the mind of youth that grow it must in one direction or another, either in useful fruition or useless growth. Take that wild, wayward, straggling plant apply the pruning knife, with vigor lop off those shoots that yield no fruit, nail it to the trellis, and how soon the change is apparent when full of fruit and beauty. So with the mind,

Trade and Navigation For 1871.

We have received by special telegraph, from our correspondent at Ottawa, the following returns of the Trade and Navigation of the Dominion for the year 1871.

The comparative value of goods entered for consumption, duties collected thereon, and value of the exports during the last seven years 1865-70 and 1870-71, are as follows:

1869-70 — Entered for consumption, $71,337,603; Duties, $9,402,940. Exports, $73,873,490. 1870-71 — Entered for consumption, $80,947,482; Duties, $11,843,655; Exports, $74,173,018. Increase in 1870-71. Entered, $9,609,879; Duties, $15,709,879; Exports, $300,128.

Looking at the two other countries with which the great bulk of Canadian trade is carried on, Great Britain and the United States, we find that the value of goods entered for consumption from the former has increased from $38,595,494 in 1869-70 to $40,168,170 in 1870-71, or about 27.40 per cent; and that the amount entered for consumption from the United States during the same periods, respectively, was $24,728,166 in 1869-70, and $29,022,387 in 1870-71, or an increase of 17.38 per cent.

The value of our Exports to Great Britain has, however, somewhat decreased; the returns for 1869-70 showing a value of $32,487,201, and of 1870-71, $24,173,224. Our Exports to the United States have decreased, the values stated for the same periods, 1869-70, being $32,984,652, and for 1870-71, $30,975,042, leaving still a large balance of Exports to the United States over Imports from that country of nearly $2,000,000.

While the British Trade still takes the largest amount of trade in Imports and Exports last year has increased over the antecedent year by $536,671, while the trade with our own exports to those Islands and British Guiana. The imports values which in 1869-70 amounted to $2,423,421, suffered a reduction in 1870-71 of $2,015,237, while the Exports to Cuba, however, show an increase from $1,280,268, to $1,498,884.

The Shipping returns exhibit a considerable increase in Tonnage, both British and Foreign engaged in the carrying trade with countries outside of the Dominion, both by sea and from our inland waters.

The total Tonnage so employed has been for the last two years as follows:—Inwards 1869-70, 4,796,125 tons; Outwards, 5,619,745 tons. 1870-71, Inwards 6,676,774 tons; Outwards, 6,549,257 tons.

The Province of Manitoba figures for the first time in the Annual Table of Trade and Navigation of the Dominion. The returns covered by the return, have been for the last half only of the fiscal year 1870-71. The tariff under which the Customs duties are at present collected, is that which obtained at the time of the organization of that section of the country into a Province, and the rates of which are 15 per cent ad valorem imposed by the general tariff of the Dominion.

The value of goods imported and entered for consumption during the six months referred to, from the first of January to the 30th of June, 1871, is $1,267,000, and the amount of duties collected $15,723. The value of goods exported from the Province of Manitoba, for the quarter ending 30th of June, 1871, is $30,620, the great bulk of which consists of furs dressed and undressed.

A comparative table showing the quantities and values of the principal articles, the growth, produce, and manufacture of the Dominion, exported during the last fiscal year represents an increase in all branches of our products except that of Agriculture, viz:—

Produce of the Mines—1869-70, $2,487,008; 1870-71, $2,221,461. Fisheries—1869-70, $3,608,549; 1870-71, $3,990,275. Products-Forests—1869-70, $20,947,434; 1870-71, $22,350,211. Animals and their products—1869-70, $12,138,161; 1870-71, $12,582,925. Agricultural Products—1869-70, $13,676,619; 1870-71, $9,853,000. Manufactures—1869-70, $2,133,659; 1870-71, $2,201,331.

Statement No. 25 exhibits by Provinces the number and tonnage of vessels built in the Dominion during the fiscal year under consideration, by which it appears that the totals in the Provinces respectively are as follows, viz:—

Ontario.—Number of vessels, 55; tonnage, 7,777; average tonnage of vessels, 1,415.

Quebec.—Number of vessels, 80; tonnage, 20,664; average tonnage of vessels, 258.

Nova Scotia.—Number of vessels, 108; tonnage, 23,355; average tonnage of vessels, 3,088.

The statement shows that not only the largest number of vessels and largest aggregate tonnage of shipping are built in the Maritime Provinces, but that the average tonnage of such vessels is as 300 to 258, compared with the Province of Quebec, and 206 to 141 compared with Ontario, the difference, however, readily explained, as regards the latter comparison from Ontario's inland position.

The value of bonded goods in the Queen's warehouses in the Dominion, at the close of the fiscal year 1870-71, was $2,940,005, representing duties under the existing tariff to the amount of $2,940,005.67.

Comparing by provinces the custom duties collected during the late fiscal year with their respective collections for the year preceding, we find that the percentage of increase in each province has been as

In Ontario, 37.98 per cent.; in Quebec, 22.69; in Nova Scotia, 17.41; in New Brunswick, 19.43.

The proportion of the whole amount of duties collected in the Dominion during the fiscal year ending the 30th of June, 1871, which each of the four provinces named contributed in customs revenue stands as follows:

Ontario, 28.20 per cent.; Quebec, 50.26 per cent.; Nova Scotia, 11.27 per cent.; New Brunswick, 10.22 per cent.

The gross amount of customs duty collected in the Dominion of Canada for the twelve months ending the 30th of June, 1871, compared with the collections of the twelve months ending the 30th of June, 1870, shows an increase of upwards of 2½ per cent. in the former over the latter period.

A Mine of Soap.

The Pueblo (New Mexico) *Chief* has the following:

The latter day one of our prominent citizens rode out up the mountains a few miles on a prospecting tour, and at a certain point near the banks of a fine stream noticed some rocks of peculiar formation. He investigated by that curiosity so fatal on a certain momentous occasion to our mother Eve, he broke off a piece, and taking it in his hand plunged it into the water for the purpose of knowing its composition and grain. Upon taking it out of his hands, to our gentleman's surprise to see a lather formed, and with a vigorous rubbing the stone proved to have sagaceuous qualities, in fact possessing all the *cleansing virtues of the most excellent soap*. Curiously enough, the stone was identified with the profound conviction without that he had found a bonanza, and immediately gathering up a few specimens and brought the same to the office of Judge Wm. V. Thomas, where it is now on exhibition and can be inspected by any person so curious. The stone is of a dun color, the hardness of chalk, and forms a perfect lather, while it effectually removes all grease spots from clothing. We have tried the soap personally, and must pronounce it a success. After bathing it from the skin as soft and smooth as that of a new born babe, while the odor is quite pleasant. It is certainly a remarkable discovery, and the only query now is, "what next?" A country that can produce mountains of gold and silver, narrow gauge mules, tarantulas, flea bites and dogs, and the mines of soap on the whole with, must be capable of producing almost any wonder.

FRUIT-GROWING IN CALIFORNIA.—The raising of tropical fruits in the southern portion of California is a large and profitable business, and promises to become one of great importance. Orange, lime, and lemon trees raised from the seed there bear in three months or tenth year, and the profits on orange trees are greater than those of any other fruit, yielding at the rate of from $200 to $500 a tree, 50 trees being fair to the average to an acre. These trees need constant irrigation, and can be transplanted at almost any age without injury; but trees over three years old are seldom to be found at the nurseries. Walnuts yield a profit from full-grown trees of from $600 to $1,000 an acre. They require irrigation only in the uplands; in the valleys they grow well without it. The olive is also a tree which thrives luxuriantly in that region, and literally rewards the cultivator. In time the California olive crop will be of great value.

THE NEW STATES TARIFF.

Additions to the Free List.

The Bill now before Congress to amend the Tariff, and which is certain to become law, makes the following additions to the free list:

And be it further enacted, That on and after the first day of April, 1872, the importation of the articles enumerated and described in this section shall be exempt from duty, that is to say, agates unmanufactured, almond shells, aluminum, amber beads, Bath brick and Bristol stones, birds stuffed, potter's bullion roots or bulbs, white and French, and all other chemicals, drugs, dyes, and medicines; angelica root, annato extract, annatto or arnotto, aqua fortis, assafœtida, chromic acid, sulphuric acid, St. John's bread, benzar stones, black salts, bleaching salts, blue mass, blue vitriol, bristols, balsam copaiba, balsam fir, balsam Peruvian, balsam tolu; borax, crude; borate of lime, brimstone, native or crude; burgundy; calomel; cobalt ore; charcoal; cow or ox pox or vaccine virus; curry powder; cudbear; cudbear, spent; dry, or oxide of iron; coltsfoot, crude drug; controyerva root, cowage down, civanite or terra marita, cocoa nut shell, crude; cocoa nut eye, leaves, plants, roots, and seeds, medicinal, in a crude state, and not otherwise specified; galanga or galangel, gentian root, Guinea grains, or grains of paradise; hellebore root, valuable, drug or preparation of iron, matico leaf, musk, crude; marsh mallows, sugar of milk, muricate, a dye; myrobalans, nux vomica, orris root, crude; polypodium, pulu, potash, crude; seneca root, staves acre, crude drug, storax, or styrax, crude; sarsaparilla, Honduras, or Honduras sarsaparilla, crude; sponge, sulphate of magnesia, epsom salts, sulphate of soda or salt cake, sulphate of quinine, sulphuric ether, spirits, turpentine, sassafras, snake root, tin, crude; tutia, crude; Venice turpentine, vanilla beans, verdigris, zinc crystals, oxide of uranium, Venice turpentine, coir, diamonds, rough or uncut, indigo, madder, munjeet, drugs, dried and ground or prepared flowers, flints, fish skins raw or unmanufactured, fruits, green or unpreserved in alcohol, fruits, dried and preserved in other wise; specified, gold beater's skins, hair of all kinds, except that of the human head, hair of cattle raw, or uncured whether dry, salted or pickled, and skins, bones, ayr stones, horns, hoofs, ivory, feather, unmanufactured, hoofs, ivory, feather, unmanufactured, hoofs, ivory, feather, unmanufactured

Destiny.

BY T. B. ALDRICH.

The rose, was as moonlight, and weighed down
Each with its loveliness as with a crown.
Dropped in a florist's window in a town.

The first a lover bought. It lay at rest,
Like snow on snow, that night, on Beauty's breast.

The second rose, as virginal and fair,
Was worn by a young girl with golden hair.

The third, a widow, with new grief made wise
Shrik in the icy palm of her dead child.

FARM AND GARDEN.

Interesting Notes and Comments.

MAKING ASPARAGUS BEDS.

This excellent and wholesome vegetable should be grown in every garden that is possible. Where there is room enough to grow it, provided the tenant has a long enough lease to stay three years or over. It takes up but little room, as quite a small bed will give a good supply to a moderate family. The best time for making the beds is during the month of April, or as early in March as the present can be carried on during the early part of May, as it is necessary that the frost should be quite out of the soil before operations are begun. Commence by digging out all the soil in the space to be occupied by the asparagus bed to a depth of at least two feet. Throw this to each side, or one side of the bed, and trench the top of the bed with well-composted manure, mixed with the top soil to a depth of eight inches. The bed when finished will be considerably higher than the surface of the ground, but will settle down as the manure decomposes. If you intend to sow seed you must have three or four inches of fine earth on top in which to sow the seed. This plan, however, if adopted, will require fill the third or fourth year after planting before the asparagus can be used, and it will not be safely to be so good cuttings intended to in the way of cultivation and thinning out. Most of the nurserymen and seedsmen can supply roots of two years' growth. Plant these in the bed, setting them well down so that their crowns will be six inches below the surface of the bed, and water them well when setting out. If that fine new sort, *Conover's Colossal*, can be had, the roots should be planted a foot apart each way, but with the common sort the plants should be set eighteen inches apart one way and a foot the other.

After setting out, the surface of the bed should be kept clean and free from weeds. It should be kept free of these by raking it while the weeds are very young, until the heads of the asparagus show through the soil. After this time great care must be taken not to injure the crowns by hand pulling them, as it will never do to cut the surface with a hoe and risk cutting off the crowns of the plants. Usually there will be no produce the first season after setting out the roots, but if the bed is well managed, and the soil kept clean, and no interference with the crowns is allowed, a good crop may be had the second

We should not hesitate to recommend to any friend of ours, Parson's Purgative Pills; they are scientifically prepared, and are adapted to all the purposes of a good purgative medicine.

Decidedly the best remedy that has ever been discovered for rheumatism, wounds or stiff joints, flesh wounds, sprains, bruises, cuts, and burns, is Johnson's Anodyne Liniment. Give it a trial, and always recommend it to our friends.

The way "to minister to a mind diseased" is to take Peruvian Syrup, a protected solution of the protoxide of iron, which gives strength and vigor to the whole system, restoring the mind to its natural vigor.

BURGLARS IN BRIGHTON.—The dastardly attempt to break open Brighton merchants and steal from them in the dead hours of night their loose cash requires close vigilance on the part of those engaged in trade. Your readers will be glad to learn that every effort is made on the part of Bullock Bros., Wide Awake Store, to frustrate such attempts, and keep on hand, for the accommodation of the public generally, over $6,000 worth of choice family groceries, which will be sold to suit customers for the next thirty days. Remember the place, BULLOCK BROS., Brighton. 7-8

Dr. Wheeler's Compound Elixir of Phosphates and Calisaya.

THERE is no Diseased Condition of the body in which Dr. Wheeler's Compound Elixir of Phosphates and Calisaya may not be used with positive benefit. Being a Vegetable Food and Nutritive Tonic, it acts physiologically in the same manner as one of the Digestion of Healthy Blood. It sustains the vital forces by supplying the waste occasioned by living on, of nerve and muscle, as the result of mental and physical exertion, enabling mind and body to undergo great labor without fatigue. Its action is not that of a stimulant, but broken down with Wasting Chronic Diseases, by fast living with Wasting Chronic Diseases, ordinary, its effect being immediate in energizing all the organs of the body, thus at once being absolutely necessary to cell for health and the growth of all. Sold by all Druggists. Use Nature's great restorative, and for all time Sold by all Druggists at $1.

OUT OF THE FIRE.

J. H. WILLOUGHBY would call the attention of the citizens of Trenton to the fact that he is clearing off, without reserve, the Goods damaged at the late fire. Also, that he is Spring Cleaning a large Stock, are arriving weekly, and by the 6th of May will be opened out. Call and witness with a better Assorted Stock than ever. Be sure and call and secure bargains.

J. H. WILLOUGHBY

BRIGHTON, April 29, 1872. 18-tf.

LONDON, April 30.—The *Times*, in an editorial upon the present phase of the Alabama claims question, congratulates the United States for proposing that the liability of neutrals shall never extend beyond the direct consequences of a breach of neutrality, thus paying the way for a satisfactory settlement of the differences between England and America.

Not one quarter of the talent of the churches is developed and in use. Many of the strongest men do but little for the spiritual interests of their families or their neighbors. They do business with energy, but serve God with a slack hand; in temporal things they are eager and enterprising, in spiritual things they are *asleep*.

Trenton Courier,

THURSDAY, MAY 2, 1872.

COMPLIMENTARY REMARKS.—From all quarters we hear the *Courier* favorably noticed. Our friends will please accept our thanks for the same and also please remember that we live by the *Courier* and shall be very grateful for any assistance in the circulation of the same. We offer it to all new subscribers for the remaining eight months of this year for 35 cents. Send in your names with cash at once. GEORGE YOUNG, *Publisher.*

It is expected that the first sod of the Kingston & Pembroke road will be turned on the 1st Sept.

MR. S. H. Cochrane, County Attorney of Ontario, died of congestion of the lungs the other day.

NEW BANK AGENCY.—An effort is being made by the business men of Colborne to induce one of the Chartered Banks to establish an agency in this village.—*Express.*

The Dominion Government propose to pay $2,000 to the parents of Thomas Scott, murdered at Fort Garry.

PICTON, April 27.—Mr. John. A. Roblin, late Registrar of Prince Edward County, has been dangerously ill; he is slightly better now, and hopes are entertained of his recovery.

BARRAGER.—Convicted of wilfully poisoning his wife, and sentenced to be hanged, had his sentence first commuted to penitentiary confinement, and last week was set at liberty.

In reply to the Messrs. MacLellan's advertisement in the COURIER to let their stores in Trenton, no less than 17 applications have been received.

COURT OF REVISION.—The first sitting of the Court of Revision for the village of Trenton is announced to be on Wednesday the 8th, at 10 o'clock a. m.

For the Township of Murray on Saturday the 11th at 10 o'clock, a. m.

SAD ACCIDENT.—On Sabbath morning last, as Mr. Haynes of Oak Hills, Percy, was in the act of drawing water from a well with a rope, he fell into the well through an opening about 14 by 16 inches and was drowned.

STEAM MILL.—On Saturday the whistle called the men to commence their summer's work. The water is so low in the bay that they have to haul the logs into the water with horses. The season is much later than last year.

SR. HELEN.—On Monday evening this welcome week's rain made her first appearance. Great was the cheering on her arrival, nearly all Trenton turning out to visit her. During the winter she has been thoroughly renovated, and refitted for the accomodation of passengers and freight. For time of sailing see adv.

AN EXPECTED MARRIAGE.—A Toronto rumor has it that the marriage of Hon. W. Macdougall with Miss Minie Beattie, daughter of Dr. Beattie, of Cobourg, but now of the Census Bureau at Ottawa, is on the tapis. The wedding is expected to take place in June, and the happy couple will make an extended tour in the old country.—*Ontario.*

NAVIGATION OF THE ST. LAWRENCE.—Mr. Colburn introduced a bill authorizing the appointment of a commissioner to make a survey and report upon the navigation of the St. Lawrence river from Lake Superior to the mouth of the St. Lawrence, and requesting the Dominion of Canada to appoint a commission to co-operate. Referred to Committee on Foreign affairs.—*Washington Letter.*

SPRING.—We are in the last month of spring and no showers yet. The dry weather is very favorable to ploughing and sowing, but rain must come shortly or the hay crop must be light. The accounts of fall wheat are not at all encouraging, the late frosts affecting it very much. Hay has sold readily the last fortnight at $20 a ton.

Since writing the above the blessed rain has come.

The Teachers' Convention intended to be held on the first Friday and Saturday in May, is postponed until the 24th and 25th of May, so as to have the presence of Mr. Scadell, Inspector, North umberland; Mr. Johnston, Inspector, Hastings; Professor Macoun of Albert College, and other celebrities. Due notice of programme will be given, and all preparations for making it a big day in Brighton, in respect to Educational matters.—*Ensign.*

PACIFIC RAILWAY.—The length of this road is estimated at 2,700 miles. The Government have a bill before the Dominion Parliament asking power to bargain with a company or create a company for its construction, and six hundred miles on each side of the road to grant in fee simple to the company and a half to be held for sale by the Government, also 30 millions of dollar cash to the company for the construction of the road. If this bill passes it will throw into the hands of this company about 30 millions of acres of the best land in the Dominion and present the Government making any New Zealand look paltry. Apart from settlement about 30 millions more or the balance of arable land in the possession of the government.

HYMENEAL.

There are times in the history of ages as well as individuals, which agitate them to their utmost capacity. Either a fire or a wedding seems to be requisite motive power in Trenton. Those who have been married want to get transported with the half-forgotten raptures of such an occurrence once again, and ried life, in anticipation of the bliss of coming days join the festive throng. On Tuesday evening last the 30th of April one of those circumstances took place. frequent than fire we are thankful to say prevailed itself on the occasion of Miss Bonter's marriage.

St. George's Church quaint in its oil color or decoration in imitation of the Catacombes of Rome, festooned with evergreens, and illuminated by means of the new and handsome chandeliers, long before the hour appointed for the interesting ceremony, was crowded in pews and aisles.

At ten minutes past eight, the guests arrived, and about ten minutes after the bridal party.

Mr. John Henry Willoughby, the Groom, supported by Mr. George Bonter, Dr. Willoughby and Mr. A. H. Wright, three members of the medical profession, took their stand at the altar and almost immediately after Miss Louisa Sarah Bonter leaning on her fathers arm approached the altar followed by her bridesmaids, Miss Willoughby, Miss Woon, and Miss Biggar took their places.

The regularity of the height of the ladies contrasted remarkably with the up and down appearance of the gentlemen. The Bride was very becomingly dressed in white silk, the Bridesmaids were dressed in white tarlan and pink trimmings.

As the Bridal party ente ed the church the choir sang the 212 hymn on "Holy matrimony." The Rev. W. Bleasdell assisted by the Rev. James Morris of Brighton, tied the indissoluble knot, and made two happy. The responses were most distinct as uttered by the bride, and the groom forgot to seal the ceremony with a kiss.

The hearty well wishes of the whole community go with the happy pair. They started on the night train east on their bridal tour.

We are the thankful recipients of a slice of the wedding cake.

IN MEMORIAM.—The Rev. W. Bleasdell, M. A., on last Sabbath at the close of his sermon from John 15 Chap. and 13 verse, then proceeded to the late Robert T. Deans:—"A very little over a week back we have seen one who was in the full vigor of life, and health and manhood carried to his grave amidst the sorrow and regret of the whole community, and at the close of a life of a week or two full of years and pressed down with their weight was borne to the same culminating place of our race—the silent tomb, Knowing that I have watched away the hours of childhood through the maturing and trying periods of youth and manhood, I ever admired him for his kind, affable and obliging disposition, and circumspect, steady and orderly conduct which secured him the respect and love of all who knew him. His late father (with whom I was intimately acquainted) ever loved him and had great satisfaction in him for these most excellent qualities, to which I have just adverted. And since his return here to take up his residence among us he has been ever a regular and strict attendant, with his now much bereaved wife, at the services of this church. A cold caught at our late destressing fire through his great exertions at it, brought on an excessive development of disease and injury both of body and mind, to which it has pleased God that he should succumb. Under these circumstances we can only bow in meekness and resignation to the will of God and tender our kindest sympathy to her who has the greatest reason to mourn his loss, and to those near relations who are here, or at a distance, deeply feeling his removal thus from our midst when mere human foresight would, so short a time ago, have looked a much longer continuance in this busy world. But in the words of the beautiful hymn:—

"Brief life is here our portion;
Brief sorrow, short lived care;
The life that knows no ending,
The tearless life is there."

The Contractors for the construction of the Grand Junction Railway, Messrs Brooks, Brown & Ryant turned the first sod at Hastings, in the County of Peterborough, April 17th.

BAY NAVAGATION, 1872.

The steamer Maude will run during this season under the command of Capt. Wm. Mowlon, between Picton and Belleville.

The steamer Rochester will run between Belleville and Cape Vincent, daily during the coming season.

The steamer St. Helen, having been overhauled, will ply on her old route, between Trenton and Montreal every week and return.

The steamer Picton having had a new upper cabin built during the past winter, is now in use on the boat and will ply between Belleville and Oswego, three times a week, touching at Kingston both ways.

The steamer Norfolk has recently been purchased by Captain Wesley, and will run between Trenton, Belleville and Picton daily.

The Quail is to ply four times a day between Napanee and Mill Point, to meet the Maud.

A widow named Milligan, residing at Newburgh, dropped dead last evening after weaving six yards of carpeting and doing her ordinary house work as usual through the day. She had suffered from no previous sickness.

An Indian, named David Green, was found murdered Tuesday morning, a-bout a mile below Newport, and mangled so horribly that it was almost impossible to recognize him. He had been at a tavern at Newport on the previous evening with a number of other Indians, and this was the last that was seen of him. The perpetrators of the foul deed have not been discovered. It is expected that whiskey had something to do with it.

In applying for an act of incorporation, the proprietors of the town of Toronto *Mail* applied as follows:—Messrs. Alexander McGregor, Wm. Gooderham, W. H. Howland, Christopher Robinson, T. C. Patterson, Matthew Crooks Cameron, Alfred Boultbee, Henry O. Brien, Robert Hay, Edward Percy Boulton, Joseph Keeler, Edward Harris, J. Plumb, Noah Barnhart, F. W. Glen, William Beverley Bodly, Donald A. Smith, Lewis Moffat, Francis Shanly, Edmund B. Dennis, A. T. Todd, D. McCarthy, jun., Remigius Elmsley, Nesbitt Kirchhoffer, George Cox, John Rankin.—Chisholm, Alfred Jury, Hugh Allan, Messrs. Howland, Keeler, Carling, Morrison, McInnes, Worts, Patterson and —Chisholm.—"Too many cooks"—but it would be cruel to complete the proverb.—*Ontario.*

LOOK AFTER YOUR CELLAR.

Is it damp, close, filled with disagreeable odors proceeding from germinating or decaying vegetables? If so, it is high time you give the matter your earnest attention. Are you aware that locality the germs of diseases and yourself and family are liable to be prostrated at any moment.

You think your cellar or basement is in a good sanitary condition; do you know what it is? Have you fairly and carefully examined the premises? Have you looked over the potatoes, turnips, squashes, and other vegetables, to ascertain their condition? We know that diptheria, typhoid and scarlet fevers, and many other most serious illnesses have their origin in cellars, both in city and country; and we can do our readers no greater service than to urge them to see that, at all times, they are in a dry sweet wholesome condition. Why should farmers and farmers' families, living in the country, away from the pestilential vapors of cities, be so subject to attacks of malignant diseases? There is a reason for it, and we can point it out. They arise from the indifference manifested to the observance of hygiene rules, and the violation of sanitary laws. Cleanliness is essential to health, and it is just as necessary in the country as in the city. A family living over a damp cellar, small, sleeping rooms, stoves—these are all agents of evil, and are fast making the homes of farmers almost as unhealthy as those of the dwellers in cities. Are these suggestions worthy of consideration?

Correspondence.

For the Courier.

To the Members of the Official Quarterly Meeting of the Trenton Circuit of the Wesleyan Methodist Church.

DEAR BRETHREN,—As it is probable I shall not be able to attend your next meeting, at which an important matter is to be submitted for your consideration, I take this method of expressing the substance of what I should probably say if I were present.

Methodism has its *essentials* and its *circumstantials*. Its essentials are the same in all *countries* and all *times*; its circumstantials render it plastic and progressive. They vary according to the wants of the age, the peculiarities of the people, or its own power to do good by propagating itself.

Mr. Wesley during his life time, very properly, kept the reins of government in his own hands. This was necessary on account of the inexperience of a large part of both preachers and people. But he had his conference annually, listened attentively to what every one had to say, and paid great deference to those on whose judgment he could rely. The Conference decided the legislative and administrative authority. A few years after this the Conference to the Sixty conceded or created the right of the laity equal numbers with preachers in business committees. Besides which in Canada no regulation of the Conference which affects the temporal rights and privileges of the laity can be of any force until sanctioned by the quarterly meetings. This is our law and usage at the present time. The question that now comes up is this—Whether in view of a union of all the Methodist bodies, which will render even more necessary than now a division of the Conference into several annual Conferences with the establishment of a representative general Conference for legislative purposes, the laity may not be appointed in equal number with ministers to compose said Legislative General Conference? I think the unification of Methodism is devoutly to be wished for by all its friends. I am acquainted with the other bodies know that with most of them there is no hope of it without "Lay Delegation." I think the change would be perfectly safe. Many lymes are as pious and as loyal to the Church as ministers. Many of them have that kind of talent which pre-eminently qualifies them for legislation. The introduction of the Lay element in this form would, in my judgment, add much to the moral power of the Church. It would popularize it in the best sense of the word. Again this is a favorable time for this change. We are in a time of prosperity. We can view the question calmly and judge it according to its merits. We fear no one, we are not obliged to flatter any one, but for one calmly and deliberately desire the association of the wisdom and knowledge of our lay brethern, in Church Legislation, for carrying on the work of God. I therefore vote YEA.

W. YOUNG.

Murray, April 26, 1872.

Married.

On the 25th inst., at the residence of the bride's uncle, Robert Lougheed, Esq., by the Rev. E. H. M. Baker, Rector of the Carrying Place, Mr. George J. Nie to Miss Hannah Stewat, both of this place. No Cards.

Died,

On the 24th of April, at his residence, Trenton, Guy C. Baker. Aged 32 years and 11 months.

On the 24th of April, at the residence Margrett, beloved wife of Peter Macpharson, Aged 66 years.

NEW MUSIC.

Greatly ENLARGED AND GREATLY Improved.

OLD COIN EXCHANGE,
Trenton, May 30, 1872.

Court of Revision.

NOTICE is Hereby Given that the Court of Revision for the Village of Trenton will meet at the Town Hall, on Wednesday the 8th day of May, 1872, at the hour of ten o'clock a.m.

All persons interested will please attend.

JERH. SIMMONS, *Clerk.*
Clerk's Office, April 29, 1872.

THE VICTORIA CHEMICAL CO'Y.

Sole Proprietors and Manufacturers of the Celebrated Victoria Carbolic Preparations. Laboratory and Works, Victoria Hall, Melinda Street, Toronto, Ont.

The following Genuine Preparations are sold by all Druggists. Be sure and ask for the VICTORIA PREPARATIONS, and see that you get them.

VICTORIA
Carbolated Glycerine Jelly.

This JELLY is highly recommended to Ladies as the most agreeable Preparation for the Toilet, Beautifying the Complexion, and rendering the Skin Soft, White, Clear, and free from Blotches, it is unrivalled. It will quickly remove all Redness, Roughness, Tan, Freckles, Pimples, and other Impurities. For Chapped Hands, Chilblains, Frost Bites and Sore Lips, it cannot be surpassed. Price 25 cents.

VICTORIA
Carbolic Toilet SOAP.

This TOILET SOAP possesses all the well known Carbolic properties, combining purity of Carbolic Acid, in agreeably scented, has a healthy action on the skin, prevents irritation, removes the effects of perspiration, and should be regularly used by families. Chilblains, Smallpox and Fever Patients should be washed with this Soap, and its use by persons liable to infection will materially prevent the spread of disease. Price 15 cents per Tablet.

VICTORIA
CARBOLIC Salve.

This SALVE is a rapid cure for all Skin Diseases, Cuts, Wounds, Bruises, Burns, Sores, Scalds, Chilblains, Eczema, Scald Head, Scurvy, Abscesses, Boils, Pimples, &c. It possesses all the cleansing and healing virtues of Carbolic Acid, which has been found by Physicians everywhere to possess unrivalled qualities not possessed by any other chemical preparation. Price 25 cents.

VICTORIA
Carbolic GARGARYSMA.

This GARGYLE is the most reliable and effectual Remedy for the Cure of Sore Throat, Hoarseness, Diptheria, Bronchitis, Irritation of the Bronchial Tubes so common in this changeable climate, Catharna, Offensive Breath, Ulcerated Gums, and all diseases of the Mouth. For Public Speakers and Singers it is invaluable. The Carbolic Acid entering into this Gargle are used by all Physicians, and for the cure of the above disorders are now, and deservedly will become popular in the *Materia Medica.* Price 25 cents.

VICTORIA
CARBOLIC DISINFECTANT.

This DISINFECTANT is a sure preventive of Typhus and Typhoid Fevers, Cholera, Small-pox, and all infectious diseases. It will prevent Contagion in Cattle. It is also invaluable for Disinfecting Water Closets, Drains, Cesspools, Stables, Slaughter-houses, &c., and for destroying nauseous effluvia from Glue or Gelatine Factories. It will drive away Mosquitoes, Moths, Flies, Cockroaches, &c. Meat, Fish, &c., can be preserved from putrefaction by its use. Carbolic Acid was selected by Her Majesty's Royal Commissioners, in preference to all other products, as the best Disinfectant for the prevention of infectious diseases. Price 25 cents.

VICTORIA
SHARPENING AND POLISHING PASTE.

This PREPARATION is unequalled in its rapidity for Sharpening and Polishing Cutlery, Table and Pocket-Knives, Razors, Surgical Instruments, Shoemakers Knives, Plane Bits and Chisels, &c. Nothing has ever been discovered which has sprung into popularity more quickly, or become of so much value in every household and workshop for general usefulness. Price 25 cents.

Court of REVISION.

NOTICE is Hereby Given that the Court of Revision for the Township of Murray, will meet at the Town Hall on Saturday, the 11th day of May, 1872, at the hour of ten o'clock a.m.

All persons interested will please attend.

H. FIELDHOUSE, *Clerk.*

GEO. SHERWOOD,
J. C. H.

Dr. WOOD

Proprietor of the

Ottawa CANCER Infirmary.

SPARK STREET AND MARIA STREET,
OTTAWA. ONT.

CANCER CURED,

By a New, but Certain, Speedy, and nearly PAINLESS PROCESS,
WITHOUT THE USE OF THE KNIFE.

The cure will be guaranteed, and as a proof thereof, no pay will be required until the cure is complete. The moment a cancer is discovered it should be cured, and the sooner it is done the more sure and cheap. But when of longer standing, and there is nothing to gain, and everything to lose, by delay, and the case seems a harmless lump in the breast, neck, lip, nose, eyelid, or any small part of the lip, may, in a few short months, become a hideous, disgusting, and painful mass of disease. If required, references can be given to parties who have been cured, and to those who are now sound and healthy. All communications promptly answered. No money is required in advance, and none until the cure is complete.

12-ly.

HASTINGS MUTUAL Fire INSURANCE Co'y.

HEAD OFFICE, *BELLEVILLE*, ONT.

President—M. Bowell, Esq., M.P.

Fraser, Esq., Wm. Bleasdell, Esq., R. E. W. Williams, M.D., George Cunningham Esq., Henry Monk, Esq., R. D. Lazier Esq., Levius Empey, Esq.

Honorary Directors—Hon. Billa Flint, Senator; James Grover, Esq., M. P., Henry Corby, Esq., M. P., E. Gibbard, Esq., M.P.P., John Ross, Esq., M.P., J. Cummings, Esq., Hon. Robt. Moody, A. F. Wood, Esq., Warden County of Hastings, S. S. Rose, Esq., County Treasurer, J. A. McGinnis, Esq., N. S. Appleby, Esq., Hon. G. Humphrey, Esq., R. Orser, Esq.

THIS COMPANY IS NOW DOING A flourishing business. It has a Farm, a Town and Village Branches, both managed by the Farm Branch and not liable for a loss in the other Branch, and the expenses of working is borne by each Branch in proportion to the amount of business done in it. Insurance can be effected as cheaply in the "HASTINGS MUTUAL" as in any other Mutual in Canada, and it is to the interest of every person in this vicinity to patronize a home Company, and thereby keep at home their own resources, instead of sending them to enrich the coffers of strangers. Call and see the Agent of the Company in your locality, or address all letters to

SAMUEL R. WELLS, PUBLISHER,
389 Broadway, New York.

The Public Like Facts.

FACT No. 1.—Wm. Johnson's business has been a great success. His second year's sales were fifty per cent in advance of the first, and the third year's sales were forty per cent increase on the second. This increase of SEVENTY per cent in two years.

FACT No. 2.—Wm. Johnson makes a specialty of HATS, CAPS, FURS and GENT'S FURNISHINGS, by so doing he is able to devote all his attention to these departments. He knows the markets better, can buy to better advantage (and half the selling is in the buying), and keeps always in stock and VERY MUCH better assorted stocks. Hence the success. He does this can do much better for his customers than the one "dabbles" in most everything.

FACT No. 3.—Wm. Johnson is the ONLY direct importer into Trenton of Hats, Caps and Furs, and will be able to sell at much less than prices charged by those who buy from jobbers.

FACT No. 4.—Wm. Johnson's stock this season is more complete than ever and in all lines you will be dowing right (for yourself) by buying from him. You will want anything in Hats, Caps, Furs and Gent's Furnishings.

VICK'S FLORAL GUIDE FOR 1872.

The first edition of one hundred and fifty thousand copies of VICK'S Illustrated Catalogue of Seeds and Floral Guide, is published and ready to send out—100 pages and an Engraving of almost every desirable Flower and Vegetable. It is elegantly printed in fine tinted paper, illustrated with three hundred fine Wood Engravings and two beautiful COLORED PLATES.

The most beautiful and the most instructive Floral Guide, published. A German edition published, in all other respects similar to the English.

Sent free to all customers of 1870, as rapidly as possible, without application. Sent to all others who order them, for ten cents, which is not half the cost. Address

JAMES VICK,
Rochester, N. Y.

DR. CARSON'S MEDICINES!

THE greatest public benefit of the age, and for which, under the many false pretenses (a few of them enclosed in wrapper around each bottle,) with a numerous list of respectable names, are offered for sale as the virtues or qualities of his various Compounds, viz:—

Lung Syrup, Constipation Bitters, Liver Compound, Lung Drops, Worm Specific, Pain Reliever, &c.

☞ The above Medicines can be obtained at the

MEDICAL HALL, TRENTON,
36-ly W. T. BARKER.

TO THE PUBLIC OF CANADA.

OFFICE OF THE
JOSEPH HALL MANUFACTURING COMPANY,
OSHAWA, ONT., MARCH 8 1872.

Being desirous of testing the merits of the different water-wheels now offered for sale in Canada, as to their economical use of water, we, as the manufacturers of the CELEBRATED LEFFEL DOUBLE TURBINE, make the following challenge, that the manufacturers of ANY WHEEL now made in Canada whether it be IMITATIONS of the JAMES LEFFEL DOUBLE TURBINE or any other pattern, IN WHEELS in all cases to be wholly manufactured by the competing parties.

we will place in the hands of any responsible party, six thousand dollars ($6,000), and the party accepting the challenge to do the same, the money to be held subject to the award of the judges. The wheels to be tested in a flume in all cases, driving the same run of stone, grinding the same wheat, and having the same number of inches of opening to receive the water, the amount of water discharged to be the measure of the amount used by each wheel.

The judges to be non-residents of Canada, and to be selected by the parties in such a mode of testing the power of turbine wheels, as shall be chosen one judge and the two to choose the third.

The owners of the winning wheel to have their money returned them, and the loser the money to go toward establishing a mechanics Institute in such locality as Canada may be the owner of the successful wheel.

The wheels to be tested at 1, 1 1/4, and full gate.

Each party to give good and sufficient bonds that the sum of $4,000 shall be paid and that pay the entire expenses of the test.

The manufacturers think that give very good results with full head and pull gateage which will be of great benefit to the user, and the public. Such wheels in our climate, where the waterpowers are affected by both cold and drouth, are the wheels required.

We claim that we are the only makers of the celebrated JAMES LEFFEL DOUBLE TURBINE WHEEL in Canada and that it is without doubt the best wheel in the world for results.

More than 6,000 of them wheels are now in operation in Canada and the United States. The sales are out other wheel over ye same period. We have not yet exceeded one-sixth this number.

Our wheel has been thoroughly tested in GREAT BRITAIN, and has fully maintained the reputation it has acquired in Canada and the United States, as the most economical waterwheel in practical operation ever yet introduced.

We are now publishing a new descriptive pamphlet containing 136 pages, giving much of valuable matter, which will be sent free to all applicants.

For further information address,

F. W. GLEN,
Oshawa, Ont.

N. B.—We desire to call attention to the following certificate:

PETERBOROUGH, ONTARIO, Dec 25, 1868.

We take pleasure in informing the public of Canada, that we have sold and furnished Mr. F. W. GLEN of Oshawa, with the Patterns, Formers, Drawings, Gauges, and all other necessary information to build our celebrated Double Turbine Water-wheel, invented by James Leffel, and known as the "Leffel Wheel." We have also obligated ourselves to furnish him with castings for same, and to no other parties in Canada. Without doubt no one can succeed in building our wheel, and no one can succeed in Canada to purchase our castings from any manufacturer. Mr. GLEN'S abilities are unsurpassed, and we feel sure that he will build a wheel that will give perfect satisfaction. We therefore commend him to the public of Canada, with entire confidence, feeling sure he will manufacture a wheel in all respects equal to our own.

A NEW SONG.

The Birds singing gaily, back to us have come,
Their plumage bright flashing in the summer's sun ;
Each telling his mate in his song and his dress,
That the buds and the blossoms have come in their grace.

It's idle, much talking, these bright summer days,
The best place to get clothing is where it best pays,
And now we'll remind you, if we have'nt before
That McCready & Co's. is the cheap Clothing Store.

In spring Suits and fassions, we are always ahead ;
Our stock all complete, of the best and well made ;
In Socks, Shirts and Collars, Neck-tie and Hat,
We'll Please you and Suit you and Fit you at that.

In Style and in Cloth, the Latest and Best
Are always our study, as our Goods will attest.
Our Gents Suits, so handsome and tastefully made ;
You'r sure to be suited in making the trade.

At morning, at noon or at close of the day,
If perchance you happen to travel that way,
Just call at our store, look about for yourself,
And see our nice goods on counter and shelf.

Our motto, small profits and ready quick sale,
To fit and to please you we never will fail,
Remember the store where they sell so cheap,
And call on McCready six days in the week.

Before, you might miss it, but certainly now,
Since the store we enlarged, and altered it so,
The Clothing Emporium, on Trenton Front Street,
Is attractive to all whose entrance we greet.

The truth should be known all over the globe,
That the very best place to get your wardrobe,
In summer or winter, as we told you before,
Is right from the shelves of McCready's New Store.

Please give us a call, get your clothes made to fit ;
Just right for the season—Trim, Airy and Neat—
Pants, Vest, Coat, Shirt, Cuffs and Collars—we say,
Everything needed to make you look gay.

THE

JOSEPH HALL MACHINE WORKS,

OSHAWA, ONT.

ESTABLISHED 1851.

THE JOSEPH HALL MANUFACTURING COMPANY,

PROPRIETORS.

WE DESIRE TO CALL ATTENTION TO OUR

No. 1 and 2 Buckeye Combined Reaper and Mower, with Johnson's Self-Rake, improved for 1871.

We believe this machine, as we now build it, to be the most perfect Reaper and Mower ever yet offered to the public of Canada.

Among its many advantages, we call attention to the following:—

It has no Gears on the Driving Wheels,

Enabling it to pass over marshy or sandy ground without clogging up the gearing, thereby rendering it less liable to breakage. It is furnished with **four knives, two for mowing and two for reaping, one of which has a sickle edge for cutting ripe, clean grain; the other a smooth edge for cutting grain in which there is grass or seed clover.**

It has malleable guards both on the Mower Bar and Reaper Table, with best cast-steel Ledger Plates. It is also furnished with our **new Patent Tilting Table, for picking up lodged grain.** This is the only really valuable Tilting Table offered on any combined Reaper and Mower. The table can be **very easily raised or lowered by the Driver in his seat, without stopping his team.** This is one of the most important improvements effected in any machine during the past two years.

Any one or all of the Arms of the Reel can be made to act as Rakes, at the option of the Driver, by a lever readily operated by his foot. The cutting apparatus is in front of the machine, and therefore, whether reaping or mowing, the entire work of the machine is under the eye of the Driver while guiding his team. The Table is so constructed as to **gather the grain into a bundle before it leaves the Table, and deposit it in a more compact form than any other Reel Rake.**

The Table is attached to the machine both in front and rear of the Driving Wheel, which enables it to pass over rough ground with much greater ease and less injury to the Table. The Grain Wheel Axle is on a line with the axle of the Drive Wheel, which enables it to turn the corners readily.

The Rakes are driven by Gearing, instead of Chains, and, therefore, have a steady, uniform motion, making them much less liable to breakage on uneven ground, and more regular in removing the grain. The Gearing is very simple, strong and durable. The Boxes are all lined with

BABBIT-METAL.

The parts are all numbered, so that the repairs can be ordered by telegraph or otherwise, by simply giving the number of the part wanted. There is no Side Draught is either reaping or mowing, and the machine is so perfectly balanced that there is no pressure on the horses' necks, either when reaping or mowing. All our malleable castings, where they are subject to much strain, have been **twice annealed, thereby rendering them both tough and strong.** Our Johnson Rake is so constructed as **to raise the Cam so far above the Grain Table that the Grain does not interfere with the Machinery** of the rakes or reels. We make the above machine in two sizes.—No. 1, large size, for farmers who have a large amount to reap,—No. 2, medium size, for farmers having more use for a smaller than for a Reaper. With the exception of difference in size, these machines are similar in every respect. Our No. 2 machine supplies a want heretofore unfilled, viz.: A medium between the Junior Mower and the large Combined Machine, both in size and price. We shall attribute our sample machines in March among our agents, that intending purchasers may have an early opportunity of examining their merits, and **we guarantee that all machines shipped this season shall be equal in quality and finish to the samples exhibited by our Agents.** We invite the public to withhold giving their orders until they have had an opportunity of inspecting our machines, as we believe that they are unsurpassed by any other machines ever yet offered on this continent. We also offer among our other machines:

Johnson's Self-Raking Reaper, Improved for 1871, with two knives, smooth and sickle edge, and malleable guards.
Wood's Patent Self-Raking Reaper.
Buckeye Reaper No. 1, with Johnson's Self-Rake.
Buckeye Reaper No. 2, with Johnson's Self-Rake.
Ohio Combined Hand-Raking Reaper and Mower.
Cayuga Chief Jr. Mower.
Buckeye Mower No. 1
Buckeye Mower No. 2.
Ball's Ohio Mower No. 1.
Ohio Jr. Mower.
Taylor's Sulky Horse Rake.
Farmers' Favourite Grain Drill.
Champion Hay Tedder.

AND OUR CELEBRATED

HALL THRESHER AND SEPARATOR,

Greatly improved for 1871, with either Pitt's, Pelton, Planet, Woodbury, or Hall's 8 or 10-horse power.

We shall also offer for the fall trade a new Clover Thresher and Huller, very much superior to any other heretofore introduced.

A NEW AND COMPLETE ILLUSTRATED CATALOGUE OF ALL OUR MACHINES

Is being published, and will be ready in early distribution, free to all applicants.

All our Machines are warranted to give satisfaction, and purchasers will have an opportunity of testing them, both in Mowing and Reaping, before they will be required to finally conclude the purchase.

For further information, address—

F. W. GLEN,
President.

OSHAWA, ONT

PARLIAMENT OF CANADA.

OTTAWA, Thursday, April 10.

SUBSTANTIVE ELECTIONS.

In the House Mr. Pinke introduced a Bill to provide for the holding of elections for the House of Commons upon one and the same day. Read a first time.

INDEMNITY OF THE SENATE.

Mr. Blake also introduced a Bill to secure the independence of the Senate. Read a first time.

TRADES UNIONS.

Sir John A. Macdonald gave notice that he would introduce a Bill to assimilate the law of Canada with that which exists in England with regard to Trades Unions, &c.

THE TREATY CONVENTIONS.

Sir John A. Macdonald submitted a message from His Excellency the Governor, transmitting for the information of Parliament correspondence upon the subject of the Washington Treaty.

Mr. Blackstock inquired of the publication in the city newspapers of the contents of the message previous to its being laid before the House. He thought this was a violation of all usages of Parliament, and demanded an explanation.

Sir John A. Macdonald admitted that he had furnished the information referred to to the editors. He affirmed that they were in possession of communications of this kind whenever they choose, and evidence was against any violation of the rules or practice of the House.

Mr. Holton differed from this view, and held that it was an act of contempt of the House to publish such communications.

Mr. Mackenzie concurred with Mr. Holton, and demanded an explanation.

Sir John A. Macdonald admitted that he had furnished the information referred to to the editors. He affirmed that they were in possession of communications of this kind whenever they choose, and evidence was against any violation of the rules or practice of the House.

Mr. Holton differed from this view, and held that it was an act of contempt of the House to publish such communications.

Mr. Mackenzie concurred with Mr. Holton, and demanded an explanation.

Sir John A. Macdonald said there was no necessity for such a discussion. He had been attacking him for his refusal to produce the Treaty, and now they blamed him for sending through the press a statement to the public which he contended he had a perfect right to make without violating any rule or privilege of Parliament.

After some further remarks from Messrs. Mackenzie, Holton and Blake, the subject dropped.

SAFETY LAWS, WEATHER REPORTS NOTIFICATIONS.

In reply to Mr. Masson, of Terrebonne, Sir John A. Macdonald said it would introduce a Bill this session to amend the present law, and its provisions would be extended to the obtaining weather reports and storm signals.

In reply to Mr. Young, Sir George Cartier said the reports of the surveys for the line for the construction of which the Imperial government had guaranteed a loan of £3,400,000, could not be laid before the House without that government.

In reply to Mr. Young, Sir John A. Macdonald stated it was not the intention of the government to introduce a general election law this session. Some minor amendments might be necessary, but it was not the intention to deal with the question. Each Province should take place simultaneously.

PENIAY BAILD CLAIMS.

In reply to Col. Gray, Sir Francis Hincks said communications had been made to the Imperial Government with reference to the claims of Messrs. Allan and Sons, and the Canadian roads, but no detailed estimates of damage had been submitted to the Imperial Government.

SEIZURE OF THE SCHOONER HORTOU.

In reply to Col. Gray, Sir John A. Macdonald said correspondence had taken place with the Imperial Government on the subject of the seizure of the American fishing schooner Horton, in the port of Guysboro, N. S., and if the hon. gentleman moved for the papers they would be laid down.

SUPREME COURT.

In reply to Mr. Blake, Sir John A. Macdonald said it was not the intention of the government to propose a Supreme Court Bill at this session.

INSPECTION OF SALT.

Sir Francis Hincks stated it was the intention of the Government to bring in a Bill to amend the law relating to the inspection of salt.

COMMISSION FOR PRINTING AND BINDING.

Mr. Young, though opposed to Hon. John Sidnell Macdonald, proposed and carried an address to the Governor General for a commission of the Government in printing binding, given out without tender to

Mr. [illegible] moved an address for a return of all custom duties received at Manitoba and the North-West since the returns ending 1871. The motion was agreed to Hon. Mr. Tilley.

MANITOBA REBELLION CLAIMS.

Mr. Oliver moved for a statement of payments made on account of claims advanced for damages sustained by the rebels in Manitoba, but, on the promise of the Minister of Justice that all claims would be brought down as soon as possible, withdrew his motion.

GEOLOGICAL SURVEY.

Mr. Oliver moved that the House should go into Committee of the whole on Friday next (to-day) to consider resolution for appropriating annually for the use of the Geological Survey, the expenditure of a thorough geological survey. Mr. Alexander Mackenzie and Sir J. A. Macdonald spoke on the motion, which was nevertheless agreed to.

INTERCOLONIAL BRIDGES.

The motion of Mr. Jones (Leeds) for copies of correspondence in connection with the Intercolonial Railway bridge at Miramichi, was agreed to. Mr. Walsh availed himself of the opportunity to state that a satisfactory settlement of the Miramichi
